

MERN DEMO

- Prepare one demo with following pages.
 - Login Page
 - Admin Panel - Dashboard
 - Admin Panel - Sidebar (Module)
 - User Module
 - Transaction Module
- Description of pages is as follow
 - Login Page
 - Contain Username,password input field
 - Forgot password (on click password will send to email id).
 - Sign In button
 - Signout button
 - Admin Panel - Dashboard
 - Contain one Sidebar loaded with three modules.
 - Admin Panel - Sidebar
 - Sidebar should contain User module which contain list of dummy user.
 - Should include Phone No./Email/Name/User ID/Type/Amount Column.
 - Contain Transaction module with list of dummy transaction
 - Transaction table will have ID/Header/Amount/Type/Status.
 - User Module
 - One can see all user in and use User ID and Password to login.
 - Only Admin can see User Type column and changes user type while if we login from user ID and password,we should not be able to see user module.
 - Transaction module.
 - If we login from user ID then we can see that user transaction.
 - If we login from Admin ID then we can see all user transaction.

Note :-

- **Basically you should focus on Role and permission feature Using which you can manipulate the data the as per logged in user.**
- **Also make sure to follow the all the instructions and incase of any confusion, you can ask your querry to sonal mam.**
- **There is no time limit for the demo task,you should submit it as soon as possible.**
